

## FNPT II Simulator Overview

Our Simulator Training Centre is the most advanced facility in the Western Cape. We are offering a wide range of advanced training services previously not available in the Cape. All this is possible due to our acquisition of a modern Flight Navigation Procedures Trainer will meet the FNPT II standard. It fully complies with the new harmonized SACAA-FSTD and the international JAR-FSTD standards and some of the main features are listed below:

- Simulates a Piper Seneca II/III twin-engine aircraft
- Enclosed cockpit, physically modelled to represent the real aircraft
- Dual controls and full IF panel on pilot and co-pilot side for crew coordination training
- Flight model fully representative of class
- For basic IF training, we can also configure it as a complex single (Piper Arrow)
- Accurate and realistic control forces, including asymmetric control pressures
- Able to simulate many emergencies, including electrical and icing
- Visual realism with wrap-around 140° projected vision system

This modern equipment is proudly South African and supplied by the company that is rapidly becoming the new local industry standard in advanced simulators.
